

PS709 Intelligent Tracking Lock Device

About Device

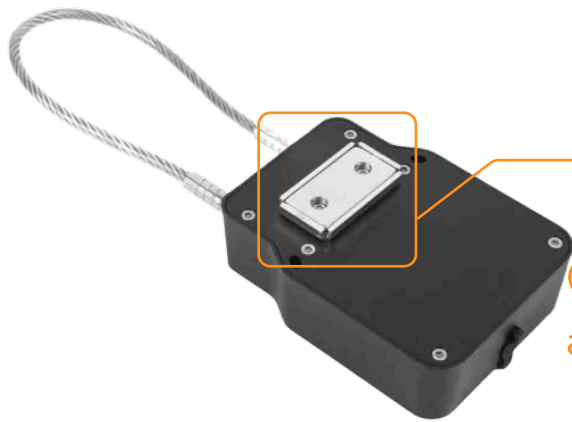

Welcome to the future of asset management with the **PS709** Intelligent Tracking Lock Device. In an era where securing and monitoring assets is paramount, the **PS709** stands as a cutting-edge solution designed to elevate the standards of security, efficiency, and global connectivity.

Feature Details

Feature Details

Magnet
(The device to stay
and fix its place)

SIM Slots
(2g-4g)

Charging Port

Key Feature

01

Advanced Security

Emphasize the importance of RFID/remote password unlocking and the illegal unlocking alarm for robust security.

02

Enhanced Efficiency

Highlight the device's long working hours due to the large-capacity battery, ensuring continuous asset monitoring.

03

Global Connectivity

Discuss the global positioning feature provided by the built-in GPS module for accurate tracking.

04

Real-time Monitoring

Stress the real-time online monitoring facilitated by the integrated wireless module, ensuring timely updates.

Technical Feature

- **RFID and Remote Password:** Secure unlocking through advanced RFID technology and remote password authentication, eliminating the need for traditional keys.

- **Alert:** Our device includes an SOS feature for immediate distress signaling during emergencies, enhancing cargo security by triggering rapid response from authorities.

- **Large-Capacity Battery:** Equipped with a high-capacity battery to ensure extended working hours, providing continuous tracking and monitoring capabilities.
- **Built-in Wireless Module:** Facilitates real-time online monitoring, allowing for immediate updates and ensuring seamless connectivity for effective asset management.

- **Integrated GPS Module:** Enables accurate global positioning, allowing users to track the device and associated assets in real-time, anywhere in the world.
- **Illegal Unlocking Alarm:** Enhances security by providing an alarm system for any unauthorized attempts at unlocking the device, ensuring the integrity of the asset management system.
